May 16, 2019

Beachmont

This week Beachmont students went on two learning field trips. Our kindergarten students went to the Franklin Park zoo. This was a great way to see firsthand how animals interact with their environments to survive. Also, our second grade students took a trip to the Revere fire station where they learned about the many roles that firefighters play in our community. We thank our teachers for arranging these experiences and our parents for help to support them.

Garfield

This week students at GES went on some exciting field trips. Students in Grade 2 visited the Museum of Natural History to learn about animals and their habitats. This will help those students in creating their own habitat dioramas as part of project-based learning at our school. On Friday, students in Grade 1 will visit the Stone Zoo to collect and analyze facts for a chosen animal. Students will then present their findings to classmates, families, and invited guests as part of a research project. On Thursday, May 16, we will host our monthly Family Movie Afternoon, showing 'The Lego Movie 2: The Second Part' at 3:00 pm in the Auditorium.

Garfield Middle

Garfield Middle School students attended an engaging and informative presentation on the dangers of vaping. Thank you to Ms. D'Apolito for working with CVS to bring this educational and important message to our school. GMS administrators and counselors will be visiting elementary schools next week to welcome our incoming 6th graders. We are excited that you won the lottery and are looking forward to meeting you. We are also excited to invite all parents and guardians of incoming students to an open house which will be held on June 4th from 4pm-6pm.

Hill

Congratulations to our own fourth grader Kamilah R. for placing first in the Massachusetts Water Resources Authority's (MWRA) Annual Poster Contest. Kamilah and her teacher, Elisa LaPlante will be honored in an awards ceremony at the Deer Island Treatment Plant. Kamilah's interactive poster demonstrated technology used by the MWRA to get water to our homes. She built models of a hydroelectric generator, a wind turbine, and solar panels to demonstrate the process of transferring water from a reservoir to the tap in our sinks. Way to go, Kamilah!!!

Lincoln

On Wednesday, May 29, top achieving ST Math students in grades two through five will be going to the New England Aquarium. ST Math is new program at the Lincoln. It teaches foundational concepts visually, then connects the ideas to the symbols and language. The visual learning ensures students are better equipped to tackle unfamiliar math problems, recognize patterns, and build conceptual understanding. With no language barriers, problems are accessible to all students; regardless of language background. Our kids are looking forward to their upcoming field trip!

Paul Revere

On Friday, May 10, Paul Revere School had an optional uniform day to raise money for the Memorial Fund established in memory of our fourth grade student, Anthony Joel DePalma. With over \$2500 raised in Anthony's memory, the generous response was both overwhelming and touching. Donations may still be made in Anthony's memory at the Revere Municipal Credit Union, 281 Broadway (City Hall), Revere. Also, on Saturday, May 18, a Blood Drive will take place at our school from 9 AM to 3 PM, as part of our Health Fair. All are welcome!

Revere High School

Congratulations to all Revere High School students who took 481 Advanced Placements exams in 22 different subjects this past week! Special thanks to Ms. Finn for coordinating the testing. On Tuesday, May 14, Culture Club students registered and pre-registered over 35 students to vote. On Wednesday, May 8, 128 RHS JROTC cadets received a Certificate of Commendation from the Mayor of the City of Revere, Honorable Brian Arrigo for their participation in the Service Learning Project, Operation Snow Angel for 2018-2019 school year. On Friday, May 10, Major Bowker had the distinct honor of administering the Oath of Office to former RHS JROTC cadet Victoria Acosta (CO 2015) on at UMASS Amherst. 2LT Acosta was a recipient of the Army SROTC scholarship and was branched into the Signal Corps. Finally, congratulations to the RHS JROTC Raider team who, during the COMAL competition on Saturday, May 11, took 2nd Place Overall, 2nd Place 1-Rope Bridge, 2nd Place Gauntlet, 3rd Place: First Aid, and 3rd Place: Land Navigation.

Rumney Marsh Academy

In keeping with our MCIEA task work, the 7th grade classes at the RMA have been busy creating carnival games for our Probability Carnival. Once the probability unit is complete, students will create carnival games based on compound probability. Students plan, design, create, and test their games! Classes then take turns hosting the carnival while other classes visit to play. Each year, the RMA students create amazing and fun games and we can't wait to see what creative ideas they have this year! Great job!

Seacoast

SeaCoast High School senior Anthony DiVito was one of 19 recent graduates of the Everett High School Resilient Coders program, an intensive 8 week 40 hour computer training program affiliated with the Resilient Coders nonprofit organization located in downtown Boston. Anthony learned how to develop and code web-pages using html, css and JavaScript. He also received training in workplace dress, etiquette and job interview skills. Anthony is interested in continuing his education in computer science by joining the 12 week Resilient Coders summer boot camp starting up at the end of the month. Congratulations Anthony and thank you Mr. Demarco for supporting this program.

Susan B. Anthony

Students in Mrs. McElligott's 7th grade ELA class recently created original pieces of work that expressed some aspect of their culture in efforts to help others gain a better understanding of who they are and their beliefs, customs, and characteristics of one or more of the groups they may fall into. Student projects included topics related to their family culture, their culture as a student, their culture as an athlete, artist, actor, dancer, and creator. Students presented their culture projects in a variety of formats that included poems, sculptures, artifacts, original paintings, drawings, and performances. Several students shared their culture with the larger Revere community during the RPS Student Showcase on May 2nd.

Whelan

On Friday, May 10th, our kindergarten team celebrated an important woman in each child's life with a "Mother's Day" craft. Students were so excited to share their creative craft with their families. Our fifth graders have been practicing their revolutionary war play. Their performance is truly taking shape as they are excited to be performing this for their parents prior to their Moving On Ceremony in June. Our fourth graders just kicked off a recycling markers and crayons project now that their successful plastic recycling program has been up and running for over 3 months.
