On Wednesday, Pre-K-2 students met Roast Beef, a 20 year old African Penguin from the New England Aquarium. Staff from the aquarium brought him in a climate-controlled cart that allowed students see him during the presentation. Students learned really interesting facts about penguins, the adaptations that help them survive, and most importantly, how we can do things to ensure our planet is healthy and the environment is sustainable so that animals like penguins can thrive. It was a great day of learning!
