

The Superintendent's Broadsheet

Revere Public Schools

Vol. 9 No. 3
September 19, 2019

Beachmont

This week marked the beginning of ST math implementation for kindergarten through 2nd grade students. Our students have been hard at work learning about this game-based visual program that provides a really fun way to develop students' conceptual understanding of key math content. With the addition of these grades, our entire school will be implementing the program. Our students are very excited to implementing really exciting program that supplements the great work of our teachers at school and at home

Garfield

The Museum of Science Traveling Program will be visiting GES next week. Students in Grade 5 will explore the relationship between heat and energy, and practice making observations and predictions about the patterns of behavior in different substances as they react to changes in temperature. GES has partnering with the Museum of Science for several years to bring highly engaging science content to our students, and they will return in October to present to our students in Grade 3.

Garfield Middle School

GMS recently received professional development on effective instructional strategies through Keys to Literacy and will be partnering with them throughout the school year to assist us in providing equitable experiences to all of our students. The student government will be starting next week and providing students with a voice on the School Improvement Committee.

Hill

This week our third grade students had the opportunity to learn about local elections from our very own Mayor Brian Arrigo. Mayor Arrigo took time out of his busy schedule to share his experiences and take questions from our students. Thank you, Mayor Arrigo! Also this week we kicked off our catalog fundraiser to support student activities at the Hill this year. Thank you in advance for all the work students and families will do to make this fundraiser a success! Our first Conversations with the Principal event is September 26th, families should be sure to check Dojo for specific times.

Lincoln

Save the date! Our PTA Back to School night is being celebrated at the Squire Road McDonald's on Monday, September 23rd. Stop by to see friends, families, and even teacher volunteers! Proceeds from the evening will go towards supporting student programming. Special thanks to the Lincoln PTA for organizing the event for our school. We hope to see you there.

Paul Revere

This week, Paul Revere School began Enrichment Clubs for our students. Clubs are offered the hour before and after school, and students may sign up for as many as they like. With 32 different clubs, taught by our teachers, there is a wide variety of offerings that appeal to every interest. Current clubs run until early January and include Lego Club, Creative Play K&1, Homework Help, Guitar, Cursive Handwriting, Beading and Jewelry Making, Movement and Motion, Speed and Agility, Advanced Cooperative Strategic Thinking, and Scratch Coding. In late January, a new set of clubs will be offered.

Revere High School

RHS is proud to announce that Coby Everton has been named a National Merit Scholarship Semi-Finalist. The National Merit Scholarship is a highly competitive award. Candidate selections are based on academic excellence. Coby was a standout for this award because of his PSAT NMSQT scores. Another achievement at the high school is the RHS Filmic Society's fourth, full length movie, I'm Q. The RHS Filmic Society, led by Paul Amato and Lauren McGonigle, is gearing up for the movie's premiere on October 9th and 10th. As with the society's first three films, their new film, I'm Q, stars both RHS students and staff. The movie will debut at Showcase Cinemas in Revere. Tickets are now on sale at the high school.

Rumney Marsh Academy

The Rumney Marsh Academy has partnered with the *Hance Family Foundation* in bringing their *Beautiful Me* program to the RMA. *Beautiful Me* is a self-esteem program for middle school aged girls, with the goal of empowering young women in an educational setting and beyond. The program focuses on positive body awareness, improved problem-solving, and the building of healthy relationships. Teachers participated in a one hour training at our first staff meeting and we would like to thank Liz Daily Ortega for taking the lead on this initiative! Stay tuned, more to come on this great program!

Seacoast

The SeaCoast seniors will be attending the 2019-20 College Fair at RHS on September 25th. Our seniors will be able to speak to college admissions representatives to learn more about the opportunities that post-secondary educations provides as well as finding a college or university that matches their career goals.

Susan B. Anthony

Students in Ms. Butler's 8th grade Civics class were able to make connections between what they were learning in class and the "real world" this week. While they are learning about the process of becoming U.S. citizens, Ms. Butler invited people who have either been through the process or are currently on the journey to citizenship to come to her classroom to be interviewed. Many students seemed to relate, as they had people in their own lives who had come to the US seeking citizenship. This was an authentic opportunity for students to show, and then deepen, their mastery and understanding of the process of becoming a U.S. citizen.

Whelan

This week the Whelan School will be visited by Duncan the "Therapy Dog." This will be Duncan's 2nd year visiting the Whelan where he will be visiting multiple classes and enjoying stories with students. Nurse Stefanie has worked diligently to partner the Whelan School with Therapy Dogs International. Students are very excited to continue this partnership and read to Duncan! Whelan School teachers participated this week in ST Math training learning about additional resources that they can utilize in their classrooms as they work with students engaged in math problem solving.
